I. Interrogation of enemies who were brought for interrogation.

1. Paying homage to images of dogs is introduced because it has political meaning – one dog is imperialism, and another dog is the Territory-swallowing Yuon enemy. We forced them to pay homage of images of dogs in order to test them because when they were arrested, 90% pretended that they were revolutionists. Once they pay homage to images of the two dogs, it means that they accept they are traitors.

Concerning consciousness: we change their consciousness

Concerning assignment: Do they respect Santebal or not?

2. Process:

We talk to them until they agree to follow us. If they refuse to say the truth, don't hit them yet – wait one minute. Then we let them confess when they started serving the two dogs and which organization.

Accompanying with the voice of the superiors is more effective (e.g. in Kratie, the tape of Kuon + sector 23, Sou + sector 24, Chhouk or Chhek)

- Don't hit enemies while they are getting angry because they don't hurt while they are getting angry.

[3.] Concerning enemies from the east:

There are a lot. It has to be a systematic interrogation in order to find out the superiors and the subordinates. We have to find out the connection with Yuon – which network? How many networks? Who gets involved? How are the networks? When? Where are weapons hidden? How would they react? How do they think when the north army moved there?

[4.] Concerning the previous documents

Request for a file of Prêng Âaok alias Phôn, Chantrea's secretary.

- Arrest Rom and make a report
- Find out the enemy's tricks
- Be honest with the collective and the party in order to wipe out the enemy.
- [illegible] get rid of sentiment with colleagues and stand on the sentiment of peasant class of the party.

3. Request: strengthen the idea, wipe out the consciousness of laziness.

4. Request: strengthen the idea of thrift.

11/3/78

1. View is standpoint and [illegible]
2. Clarification
View = idea – belief
Standpoint = strong position

(1) The issue of wiping out the enemy in Ministries

- Based on what?

1. Based on biographies – implication: got the work assignment from the enemy; whether the individual kept it confidential or not. The individual tried to keep the secret.

2. Implementation of [illegible] – left or right? [If it is] left, it is inconsistent with the form – the mass are not happy with the revolution e.g. check [illegible] once every three days. [If it is] right, it is also wrong e.g. the electricity in the rural areas is available every night.

(2) Request:

- Keep track of the abovementioned.

21/5/78

[If you work like that] Although ten thousands of enemies are taken for interrogation, we can never compile any document.

* Keep track of the movement – if there's something wrong, try to put it on the right track. Grasp the movement in your hands and keep track of the movement.

When we grasp the movement in our hands, we have the strength and strong point of view that can upgrade the movement and re-educate those who made mistakes and tell them their weak points.

III. Santebal (Security Office)

Improve and invent the work of Santebal more efficiently and effectively. If there is no such standpoint, the work is not progressing.

B. Listing the traitors brings about great improvement in the movement – the great leap forward from weakness to strength. We don't upset the masses, causing ineffectiveness of the movement.

Having seen this, we, Santebal, try to fulfill our duty and adhere to this movement (file documents).

II. Check and experiment in finding poison, weapons and Yuon

1. Finding poison:

We were very slow. Those who talked kept talking. Those who didn't talk kept quiet. In that time, there was a principle of arresting all networks. Later, we changed the plan. Then we found a lot of [poison] including DDT.

2. Finding weapon:

Like the poison, we couldn't find any in 73. But weapons hidden legally are available.
