To Beloved and Missed Comrade Chhin (លីវីន)

1. Based on the news, the revisionist enemies, especially the group 7, initiated communications with an attempt to burrow from within our army and the base.

Meanwhile, they contacted some traitors to encourage the people to be against the cooperatives and the line of our socialism revolution, especially to burrow from inside for long-term purposes.

2. The following actions, therefore, must be taken:
 1. Conducting education sessions for all the division committees in order for them to be well impregnated of the enemy artifices.
 2. Tracking any persons who have been contracted with the group 7 or have tendency with group 7 to ensure that they will not hold any leadership positions in the army, whatsoever levels of positions.
3. The ideology of comrades who work as the division representatives and play a role in contacting group 7 must be closely monitored and their compositions must be constantly changed. No same compositions are allowed.

The experience indicates that group 7 people always entice our communication committee to serve their Cambodia-invasion politics. Some committee members in some places have been enticed.

Therefore, absolute vigilance must be needed to prevent them from boring from within the army—both cadre and combatants-- especially [their] contacts with the border division is absolutely prohibited.

With warmest revolutionary
fraternity
