## To Beloved Brother 89

- 1. I would like to report to Brother on border situation regarding all targets that there is nothing to be concerned about because our comrades have always patrolled and monitored along the borderline. Since the cadres could not get together in full, the implementation of directions has not been introduced.
- 2. Regarding the internal situation, there has been no ideology of non-revolutionary coming into being. Our comrades tried to work hard and they are now robustly harvesting and threshing the rice. In some good areas, we achieved 4 metric tones per hectare. In the second category, we received 2.5 metric tones per hectare. In the third category, we received 1.5 metric tones per hectare. It is premature to make the calculation of the total yield because the threshing is still going on. Certain rice paddy fields were insufficiently irrigated. Some 60 hectares of rice paddies were insufficiently irrigated.

Since their transplantation, the water has never stayed long on the rice paddies mentioned above, although it was heavily raining. The rain water would stay only five days and then it dried out.

3. As a consequence of keeping the forces for harvesting, the study session in my sector has not been started. The rice is rapidly ripe while the north wind is blowing strongly.

With Revolutionary comraderie;

Chhin
