

To respected and beloved Angkar

We would like to give additional report to Angkar on actions to purge the contemptible traitors in the rank across the zone.

We would like to report to Angkar that so far we have purged some of the contemptible traitors and have targeted the core of their strategic traitorous force as follows:

Sector 32: All have been arrested. They include:

- At sector level: *Contemptible* Keo (កែវ)
- At district level: *Contemptible* Sith (សិក) (Udong [ឧដុង្គ] district)
- At district level: *Contemptible* Sim (សិម) (Po' nhea Leu [ពញ្ញាព្រ] district)
- Chen Samraong [ or a Chinese in Samroang]: *Contemptible* Thav (ថាវ)
- At district level: Sarin (សារិន) alias Chres (ច្រែស), member of Aoral district

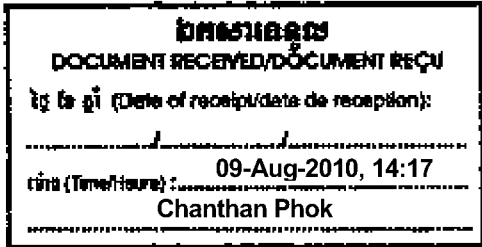

We have already sent these *contemptible* people to S-21.

Surrounding the offices:

- *Contemptible* Phoeuk (ផ្លែក), medic of the sector

About the result of dry-season rice harvesting:

The situation of offensive activity in growing the floating rice this year is relatively more enthusiastic than last year. All sectors, offices, and the military have begun growing it.

However, the actual rice yield obtained is 50% of rice production. The major reason is that rats have destroyed the rice. At some places, between 60 and 70 percent of rice has been destroyed. Members of cooperatives, production units, and mobile work units have made enormous effort to smash them. However, the small ones with the size of our thumb which hid themselves in holes under the ground ate fields of rice. Only within one night, all rice is gone.

Besides, regarding this floating rice the zone in general could not achieve the production of 3 tons per hectare. Mostly, the production between 1 ton and 2 tons was achieved.

Up until now, rice harvest is nearly complete. The preliminary figure of the harvest is:

Sector 31: 200 000 *Thng* (or bushels)

Sector 32: 911 20 *Thng*(or bushels)

Total: 291 120 *Thng* (or bushels)

Now, the base cooperative people are harvesting and start subsequently transplanting and sowing rice in the second round. Because rainy season has come, rice transplanted this time is very good.
