As regards to direct subordinates, *see* for example: **D54/115** Neak Yoeun WRI, A13, 15, 18, 22-24 ["I stayed and worked on land in Kang Keng under Yan. Yan later on disappeared, and when I asked them [leader] about Yan disappearance, they [leader] told me to stop asking about Yan anymore. After that they sent me to study in Kampong Som. Those who were sent to study had to complete the biography form, in which we were asked to report whether or not we had worked under Yan previously. As for me, I was in the same regiment with him, but I was not under his direct command [...] A15: At that time there was a study session which lasted for five days. In that study session, they asked us to make the biography. Cadres of the division included Ta Nhan and Ta Muth who ordered us to make the biography [...] A18: I assumed that the goal of that study session was for them to look for and arrest any ones who had had the connection with Yan in the past [...] A19: There was a slogan saying 'if we clear grass, we must root it out'. The arrest of Yan was done in a secret manner, and only those close to Yan could know about that. Because of that, it made me think that they were also looking to arrest those who used to be close to Yan [...] A22: But on the last day of the study session, during the hours we were making the biography there were questions asking us about that. One of the questions asked if anyone of us had ever worked with Yan in the past [...] A23: During the hours we were making the biography on the closing day, Meas Muth was the teacher. He read all questions in the form to the attendees. He explained all the questions in the biographical form to the attendees and told us what we had to [...] Q: To your knowledge, did any attendees disappear after that study session? A24: Based on my observation, three to four persons, who used to work directly under Yan, disappeared. But I did not know their names. What I knew was that after Yan's disappearance, some people who used to be close to him were sent to work in different units in Kampong Som. Before, I had suspected some and not suspected some because all these individuals held important leadership posts. I have now therefore heightened vigilance even more. In the past, the enemy conducted activities in the divisions, but there were shortcomings in attacking the enemy, to which not a lot of attention was paid. With regard to this problem, if you think about it, the activities of one or two enemies on the inside can wreck the strength of the Revolution [...] I had known something about this problem of the enemy creating a new party from the instructions that came one after another from the Party, but it did not go so deep as the information that I have now heard from the Party. From an examination of my forces, some 90 to 95 per cent of them are reliable, those who are loyal to the Party. Witness Chet Bunna, a Regiment 140 cadre, testified that Meas Muth mentioned during a meeting held at Ochheuteal Beach on 17 April 1977 that Dim was a traitor who had been arrested. As Dim only entered S-21 on 21 April 1977, this indicates that he was not immediately transferred to S-21 and was first detained somewhere else for some time, likely in Kampong Som: **D114/85** Chet Bunna WRI, A10-11, 21, 23-24, 26, 34 [“Probably in late 1976 or early 1977 [...] It was announced that Dim was accused [of] being a traitor and arrested [...] they took those people away in early 1977 [...] A21: the announcement was made on the Victory Commemoration Day of the 17 April, and was made in front of Division 164. The announcement was given at the far end of Au Chheour Teal Beach, where the Headquarters of the Navy was located [...] A23: On that day, Meas Muth was the sole person who spoke before about 1,000 soldiers from Naval Division 164 and the relevant offices in the Division, such as the medical, transportation and logistics units [...] Amongst other matters, Meas Muth also announced that Chhan and Dim had been arrested for traitorous activities. To the best of my recollection, Chhan was arrested before Dim was. Only the arrests of Chhan and Dim were announced in public. The arrests of the low-level cadres who were under Chhan's and Dim's commands were not made public [...] A24: The meeting was held in the morning of 17 April [...] A26: only Chhan's and Dim's arrests were announced. I did not know how long they had been under arrest for before the meeting [...] A34: Meas Muth said that Dim and Chhan had plotted to remove him from his position and administer the division in order to form another government, which would oppose the Democratic Kampuchean Government”]; Chet Bunna also mentioned that Kung Kien alias Oeng Vet was arrested about a month after Dim, although he was arrested on 5 April 1977: **D114/85** Chet Bunna WRI, A18-19 [“Q: We would like to show you the document from Office S-21 bearing the name of Kung Kean alias Ing Vet, document D1.3.18.4, with Khmer ERN 00017305. At that time, he lived at Kang Keng Airport [...] A19: We just knew that he was arrested about a month after Dim”]; **D114/230.1.1** OCIJ S-21 Prisoner List, No. 2368 [Kung Kien alias Eung or Oeng Vet, Battalion 631 Secretary, Regiment 63 – entered April 1977, executed 13 March 1978]; **D1.3.18.4** Kung Kien alias Oeng Vet S-21 Confession, EN 00822054 [summary of interrogator; date of arrest: 5 April 1977]; Chet Bunna's statement is corroborated by two other witnesses: Witness Leang Bea mentioned that after Dim's arrest, “Yan rose to replace Dim [...] Yan was arrested after Dim”. This witness would not have noticed the replacement of Dim by Mom Chim alias Yan unless the latter occupied his position for some time before being arrested himself. Yet it is established that Yan entered S-21 in late April 1977 like Dim: **D54/113** Leang Bea WRI, A80-81 [“Q: In your answer, you spoke about Dim's arrest. When was Dim arrested? A11: Thousands. They included Thai fishermen and Vietnamese fishermen and refugees, who were arrested and killed on the sea, on the islands, or on the mainland. [...] A20: I saw the first event, the capture and killing of a Vietnamese husband and wife and an infant about one year old on Koh Poulo Wai Chas Island at the end of 1976 or early 1977. The husband and wife and infant were Vietnamese refugees travelling by 8-horsepower motorboat. I saw the motorboat tethered on the shore nearby. I saw the couple with their arms tied behind their back and made to kneel on the ground. The soldiers on duty at the time belonged to my Regiment 62. First they hit the husband on the back of the head with a bamboo club. After the husband fell to the ground, they struck the wife the same way. Once the wife fell to the ground, the infant cried and crawled to hug the mother. A soldier grasped the feet of the infant and struck it against a coconut tree killing the infant instantly. My boat commander was my superior. Who Ta Mut received his orders from, I do not know. Q: How did you know that Ta Mut gave the orders? A2: There was a telegraph machine at Ta Mut's place. There was another telegraph machine at the former royal residence near Koh Kong Port. When the telegraph operators there received any orders from Ta Mut's place, those telegraph operators sent those orders to the ship commanders. The telegraph operators worked in their office near the port. Q: What military unit did these telegram operators belong to? A3: Those telegraph operators were sent from the division office to work there because they were trained in telegraph operations. As sailors on the ships, we did not know how to use the telegraph. Q: Did you know whether those orders were sent directly from the division to the ship commanders or were they sent first to the respective regiment or battalion levels first? A4: I did not know how the communication was done between those places. However, the communication system at my place was that telegram messages were sent directly from the division to the Koh Kong Telegram Office. The people who operated the telegraph machine were soldiers from Division 164. Q: Do you know who was the first to capture these targeted illegal fishing boats? A5: During that time Infantry Division 1 was deployed at various places in Koh Kong, and Ta Voeun was the commander of this division. Division 1 had their binoculars and radars to scan for illegal fishing boats. When they located a target they sent the information to the ship unit, and then the ship unit reported on to Ta Mut by telegram. Ta Mut would then send his orders back to the ship commanders on how to deal with those fishing boats. However, according to my observations on the communication systems between the leadership echelons in the Koh Kong region at that time, sometimes they used messengers to row their boats to communicate from place to place. They did not use radio or telegram to communicate. Q: Where were the radar and binoculars installed during that time? A6: I wish to tell you that during that time, my ship unit was not positioned in only one place in Koh Kong Town; we moved from place to place to defend against attack by Thai aircraft. Sometimes we were moored at Pory Lamdam while sometimes were moored at Pory Av Yeay Saen. These two islands were in Koh Kong. A11: One night, when I was on Koh Tang Island, I saw a boat with Vietnamese passengers and crew which was seized by the Navy of the Democratic Kampuchea. Q: When did this happen? A12: It happened sometime between 1977 and 1978. It was not in 1976. Q: Do you remember which time of year it was? A13: It was probably during the dry season between 1977 and 1978. Q: Who had seized the boat? A14: The Navy did it”].

1467 **D114/57** Som Soam WRI, A20-21 [“Q: Why did you state that the boat was not a fishing boat? A20: I stated that because the boat could carry a lot of passengers. I assumed that that boat could have been used to carry the Vietnamese migrants or refugees. Q: What genders were those Vietnamese? A17: There were men, women and children”].

1468 **D114/57** Som Soam WRI, A26-28 [“Q: Did you see the boat or the Vietnamese the following morning? A26: The following day, I did not go back to that beach, but later I heard my military colleagues saying that they all had been executed. Q: How did your military colleagues know this? A27: I am not quite sure. It was through word-of-mouth that the information travelled. I assumed that there were two scenarios. The first one was that those Vietnamese were immediately taken away and killed on the Island, or that they were kept as prisoners on the Island for a few days before they were taken to the mainland and killed. Q: How did you come up with these two scenarios? A28: I am not exaggerating. I only wanted to tell you what I knew very well. I was sure that my colleagues told me that the Vietnamese were killed. The two scenarios I have just mentioned earlier are based on my own assumption”].

1469 **D114/57** Som Soam WRI, A10-26 [“Q: Did you observe any situations related to the seizure of Vietnamese boats? A10: I saw such an event only once when I was on Koh Tang Island. Q: Would you explain to us what you saw? A11: One night, when I was on Koh Tang Island, I saw a boat with Vietnamese passengers and crew which was seized by the Navy of the Democratic Kampuchea. Q: When did this happen? A12: It happened sometime between 1977 and 1978. It was not in 1976. Q: Do you remember which time of year it was? A13: It was probably during the dry season between 1977 and 1978. Q: Who had seized the boat? A14: The Navy did it. Q: How did you know it was the Navy? A15: The ship, which was used to seize the boat, must have belonged to the Navy. I am concluding this because the ship was armed and only the Naval Vessels had weapons mounted on them. This Navy vessel belong to Division 164 of the Navy which was commanded by Meas Muth. Though I didn’t know further detailed information regarding the seizure of the boat, I surely saw the navy ship seizing and taking the boat carrying the Vietnamese crew and passengers to the Island. Q: Which Island are you referring to? A16: I am referring to Koh Tang Island. Q: Where were you located when you say this event? A17: I was returning from my visit to the port which was located about a kilometer away from my place of residence. I observed this incident quite by accident. Q: What kind of boat was the Vietnamese boat? What did you see at that time? A18: I heard that the boat had approximately ten people on board and that it was about ten metres in length, and between one and half and two metres wide. Q: Did you see the Vietnamese boat onshore or offshore? A19: I saw it onshore. The Vietnamese boat was brought to the beach. The “port” which I have referred to previously, is actually a beach which was used as a port on Koh Tang Island. It is much like the Au Chhoeur Teal Beach, in Kampong Som. Q: Why did you state that the boat was not a fishing boat? A20: I stated that because the boat could carry a lot of passengers. I assumed that

that boat could have been used to carry the Vietnamese migrants or refugees. Q: What genders were those Vietnamese? A21: There were men, women and children. Q: How did you know this? Did you see them on any occasion? A22: I was walking along the beach, when I saw the Vietnamese passengers. Among them, I saw children of between seven and ten years of age crying. Q: You stated previously that this incident occurred at night time. How could you see them? Was there any light? A23: I was between fifteen and twenty metres away from them. I saw them on the beach. The moon light was bright enough to let me see the full view of what was happening. Q: Did you see anyone being tied-up? A24: They were not tied-up. Q: Were you able to see what became of those Vietnamese? A25: I do not know what happened to them because I left the scene immediately. I saw only the children crying and heard the adults speaking in Vietnamese. Q: Did you see the boat or the Vietnamese the following morning? A26: The following day, I did not go back to that beach, but later I heard my military colleagues saying that they all had been executed”].

1470 **D114/262** Chum Chy WRI, A46-53 [“Q: [...] let's continue with further discussion of the incident involving the capture of Vietnamese refugees, clarifying this first for now before continuing with further discussions. Can you tell us more about this event? For example, how many refugees were there at the time? A46: I am not sure about the number. Maybe seven or eight persons, and whether male or female, I don't know. Q: As far as you remember, is it correctly written in this report when it says said that they were taken to be placed the vicinity of the rocky port on the east of the island? A47: It is correct. It is only because you have reminded me of this that I understand things, because it was so many years ago I had forgotten. Thank you for reminding me. Q: Was there any building or hall at the rocky port on the east side? A48: There was actually no building or hall. It was an example of a place where there were large rocks and deep water where we could request to dock boats or ships, which was why it was named the rocky port. On Koh Tang Island, there was also a pier at which ships could be docked. It was also called a rocky port. It was not a concrete port we had constructed. The rocks had emerged there of their own accord. Q: Do you remember who seized the refugee boat? A49: I had no understanding of this because back then we were a mixture of Sector 37 units and Battalion 420. I say this because I cannot respond with the facts about what we did not personally do and know about ourselves. Q: Were you able to know if the commander of Company 408 ever contacted Kampong Som City to request instructions and from whom? A50: I had no understanding of this and did not know who we had just been squeezed into initial merger with each other. I did not know who. Q: From whom did you learn about this event back then? A51: I learned about events occurring from friends who were in the army with me. Q: To your knowledge, what happened to the arrested refugees at the time? A52: When we came to know about it, I knew that they killed them. I did not know beforehand about a plan to take them to be killed. Q: Do you know by what means and where they were killed or not? A53: I only know points about which I am not certain, because back then I was young and paid no attention to killings committed by the upper echelon. Whatever they did, they never clearly informed combatants. They decided things only higher up than us. Only after the killings did we know that they were killed by gunfire. If any Thai people want to look for the bones of their relatives now, they can go to look for them in that durian plantation. After they [Khmer Rouge] had captured two 1,400 horsepower and one 1,800 horsepower fishing boats of the Thai, they took all the Thai fishermen to kill in that place. During that time they used the minesweeper ship, which was very fast, to chase and capture the

Thai fishing boats. That ship was as very fast as an airplane. During that time, when they had arrested the Vietnamese refugees, who were traveling by boat to seek asylum in the 3rd countries, they took those Vietnamese refugees to kill in that durian plantation also. They [Khmer Rouge] called those Vietnamese refugees the piglets. They said that they took those refugees to make fertilizer for the durian trees [...] A41: At the beginning, whenever we had captured any Vietnamese and or Thai, we sent them to Ta Muth in Kampong Som. But later on, Ta Muth ordered us not to waste gasoline to transport them to Kampong Som anymore. He told us that we should make them as fertilizer for the coconut trees on the Island. Each corpse was cut into two pieces, and one piece was buried under one coconut tree as fertilizer. Q: Did you see with your own eyes any corpse which had been cut into two pieces? A42: No, I did not see while they were cutting the corpse, but everyone knew about this story because the rotten smell was strong in the area and the sign of dead body swelling out from under the young coconut trees. Q: You said that after the Vietnamese and Thai had been captured, they were sent to Ta Muth in Kampong Som. Can you explain what do you mean by saying that? A43: Any persons who had been captured by the navy forces must be sent to Ta Muth in Kampong Som, and we heard at that time that those captured persons were all ended up in the durian plantation. A43: To Poulo Wai Island. Q: Who were those Thai, can you tell us? A44: They were fishermen, and they were all adults. I also saw a fishing boat there. Q: How did you know that they were fishermen and not enemy soldiers? A45: Because it was a fishing boat. Besides, our soldiers on the island said they (those Thai people) were fishermen. Hal: During the period, as I recall, Thai boats were seized often because they got too deep inside our territory and stayed on for long. Some boats stayed for the whole night, and did not return. Q: Did they encroach on our territory? Hal: Yes, they encroached on our territory, and they were seized not only at night, but also during daytime. Q: Were they seized even during daytime? Hal: Yes. They were seized because we had tracked them. We were on the island, like Koh Poulo Wai; it had old flares. It was called an old tower, but now it does not have any flares. At that time it had spaces to sit up and monitor, so we monitored all day. At night, we would spot a boat with the flare, and during daytime, we would still spot it. West of the coconut plantation, at the foot of the mountain, was the location of the durian plantation where Ta Muth had taken the Thai people to kill and then buried the dead bodies under the durian trees as the fertilizer. If any Thai people want to look for the bones of their relatives now, they can go to look for them in that durian plantation. Q: In your previous answer of EI/55.I, page 44, Lines 11-12, you said, ‘There were no Vietnamese prisoners of war during 1976 and 1977. Only after the conflict started were any prisoners of war received.’ Can you explain this point relating to what you have just said about Vietnamese prisoners? A18: This is a different episode, and I would like to clarify again what I said before. The previous answer referred to soldiers captured from any provinces close to Vietnam border. What I said above refers to just the Vietnamese families captured at sea that I received from Kampong Som. Q: It is difficult for us to understand if the Vietnamese people captured at sea could know and tell you when they were first captured and were sent to Kampong Som. If they determined that an individual person was from Kampong Som, they just mentioned the place in general, not the specific district or commune. They just wanted to know where the original place was. Hor took care of the lists from Duch. What I did was to count and record the numbers and names of prisoners so as to know about how many prisoners entered and how many exited. After that, I handed over those lists to Hor the following morning. Q: But, why was the difference between ‘Kampong Som’ and ‘Kampong Som Port’ because these two places were in the same zone and section? Could you explain this to us? When they wrote “Kampong Som Port,” that meant workers and staff who worked at Kampong Som Port who were arrested. When they wrote “Kampong Som,” that meant Khmer people and foreigners soldiers captured in Kampong Som at sea. It also meant people who fled their country and were captured. Q: What do you mean by people who fled their country? Do you mean to refer to people fleeing from Cambodia or from another country? A7: Both. I mean to refer to people who tried to flee from Cambodia and were captured, and also I refer to people who entered Cambodian territorial waters and were captured. Q: How did you know that? A8: I knew it because I questioned prisoners to find out their positions and their jobs, and they said that they worked at the port. When questioning prisoners, I asked them their names, positions, and which Zone they were from. Q: How did you know that some prisoners were arrested because they entered Cambodian territorial waters? A9: Meaning they were captured at sea by the military. They always wrote Kampong Som, even though the sea also bounded other provinces of Cambodia. Those captured were always marked as being from Kampong Som. And the reason I knew that was Hor

A21: I never encountered any Thai fishermen. I only encountered Vietnamese fishermen. I learnt some basic words and phrases from others who could speak Vietnamese, and I noted what they had told me. I would like to explain that I wrote the Vietnamese names in Khmer. I remember that I had a Cambodian prisoner whom I asked to help interpret when I questioned a Vietnamese prisoner. That Cambodian prisoner was not a staff member of our office. I think I received that interpretation assistance in the middle of the Khmer Rouge regime. That prisoner was detained in a special cell reserved for skilled workers. I do not remember the prisoner’s name or when the prisoner was killed. Q: Are you sure that you never encountered any Thai fisherman? A22: No, I never encountered them. Q: I would like to show you document D1.3.28.11 English ERN 00181627. Can you help explain this document? This document lists 31 Thai fishermen entered on 7 May 1976. A23: I do not know about this name list. Had I been the one who prepared this list, I would remember it. I do not have any problem in telling you, but this list was not prepared by me. I do not know, but I think the list might have originated from the Interrogation Office. I would also like to clarify that if I had been the one who made the list, I would have needed a Thai translator to help record this; however, I never had any Thai translator. Q: Why were you not the one who made the list? A24: Because Duch’s office could prepare their own lists, and they would not send the lists to me. Q: This point seems to be contrary to what you said in your testimony. In the extract from E1/55.1, Page 17, Lines 13-22. We would like the interpreter to read this extract in which you said that the important prisoners and foreigners were sent to a special prison, that Hor was the one who prepared the list of prisoners in the special prison, and that later Hor would give the list to you for you to record on your list. Why do you not know about the name list of those Thai fishermen? A25: For the name lists of important prisoners, my upper echelon had the right not to give the lists to me. I am sure that I never saw this name list. I may have also forgotten this list because it has been such a long time ago. But I assuredly tell you the truth about what I remember. I do not have any problem with my memory in telling you about the Vietnamese, so it would be no different for me to tell you about the Thais. Q: Did you ever see Thais in Office S-21? A26: No”].

A: I saw what seemed to be an Australian, an American; it seemed one was David Scott, an American. Q: Duch interrogated [them] himself? A: [I] saw Duch, Chan, because in interrogating foreigners they were not taken outside. That is, they were interrogated publicly because no one could understand. Q: So you saw this with your own eyes? A: I saw it with my own eyes. I had taken a prisoner to put away. I saw the interrogation. I stood and watched, but I could not understand, since they interrogated in English. His name was David Scott, it was written on his shirt, on carved wood buttons, and I could see it, that name was carved on every button. Q: When you stood and listened did you see Duch interrogate that prisoner? A: I saw Duch interrogate and kick [him], and when he [Duch] asked he answered that he was an American. One was an Australian. They came in a cement boat with three months’ supply of food. They came to spy on Cambodia. Q: They said it was a cement boat? A: During interrogation they told Chan they had been in a cement boat, those two did. And when they were taken to be killed, I heard through Soeur that they were taken in shackles, their arms tied behind their backs, and placed in the middle of the road at Tuol Tumpoung, placed at the intersection, and they put old car tires halfway up around their bodies, poured gasoline, and burned them at once. Q: Did you see it? A: I did not see it, but Soeur told me, Soeur in Kampong Chhnang, Kampong Tralach. Q: Soeur was a guard too? Q: He was in the defense unit right at the entrance. Q: Were there different techniques for Cambodians and foreigners? A: The interrogations were not the same, because foreign prisoners were questioned in public, there was no secrecy, because no one could understand, and they were not interrogated for a long time, not many times, so it was unlike the Cambodians. For them, they were interrogated one or two days and then they disappeared, that was the end of it”].

There were four Thai boats: one 1,800 H.P. boat, one 1,700 H.P. boat and two 1,400 H.P. boats. No fewer than 50 people were on one 1,800 H.P. boat. A43: This number is just my estimation according to what I observed. The number of 300 to 400 persons killed on the island is the least possible number in my estimation. Sometimes there were 50 people in one boat, and sometimes there were 70 people in one boat. When those people were captured, they were all killed on the island. During that time, many Thai boats like that were captured. Q: Do you know if the captured fishermen sent to Koh Poulo Wai Island were kept on the island or taken from the island after being captured? A44: To my knowledge, persons captured at sea were not taken anywhere besides the island. Q: In your interview with the Documentation Center of Cambodia on Page 24 in Khmer, you mentioned ‘Not less than 1,000 ... Regarding the island, some ended their journey there. Others were sent to unknown places, because they said they sent them. If they were sent elsewhere, there were sent away on a boat to wherever they wanted to go. There was no trouble, and they were sent away. But if they were not sent away, they were not given back their boat. Then they took measures.’ How does this figure relate to the 300 or 400 persons killed? A45: There were two cases I spoke of. In the first case, they captured both boats and people on the boats, and all of those people were finished off on the island. In the other case, they gave a boat to those people and let them to do whatever. Q: Do you know why they allowed the boat to return? A46: That was just what I noted. I did not personally monitor their discussions. When I was on the island, only once did I see an event in which they allowed the captured persons to return. They gave a new boat to those people so that they could return. However, I do not know if those people were Thai or Vietnamese. In fact, I never approached those boats. The number of fishermen captured was fewer than the number of fishing boats because whenever we approached the boats, the fishermen jumped off their fishing boats to escape capture. Q: According to your estimation, if you could have captured all of the fishermen on those 50 to 60 fishing boats, how many of them might there have been? [...] A22: At that time, through the windows and doors I saw many iron leg-shackles and some corpses in that dining hall. [...] A24: There were about 100 decayed bodies with shackles on their ankles. There was a very pungent smell near that hall with a lot of maggots crawling all over the hall, together with rice flies inside and outside the hall. There was liquid flowing from the decayed bodies outside

the hall onto the ground around that site. My feet became itchy after I stepped on the ground at that place. [...] A27: When we saw them, we did not remove those bones out of the dining hall. Later on, after monks came to reside at the pagoda, other people and I helped them carry those bones from the hall. [...] A28: I could not know their sex or ages because the corpses had all fully decayed. Some bones had shackles on their legs with their hands tied to the front; some leg bones had shackles and the arms were stretched and tied to a steel pipe on their shoulders behind their necks. [...] A29: The bones were shackled together in a row of about 100 persons. Q: We find it unbelievable that 100 corpses could be shackled altogether in a row. [...] A30: I saw the prisoners' bodies were shackled in a row stretching from the wall on one side to the wall on the other side of the wall along the length of the dining hall building". Witness Din Chun, the mother of Nuon Yoem, described seeing shackles inside the dining room when she later entered the pagoda compound to participate in the clean-up operation: **D54/65** Din Chun WRI, A15 ["At that time, we entered the pagoda to clean up the compound to invite the monks to stay at the pagoda. I saw a dining hall made of wood with concrete walls. In the dining hall, there were countless iron shackles"].

1773 **D54/64** Din Chun WRI, A2-5 [The witness described finding two individual graves in 1979 located near her house behind Wat Enta Nhien. Regarding the first: "When I came to live here in 1979, I built a hut on the opposite side of the road behind the pagoda. When I went to dig up wild cassava behind my house, I smelled a rotten odor there, and then I called my child to help me dig up the place that had the odor; then we saw a corpse wrapped in plastic fabric [...] Inside, I saw a decomposing woman's corpse; only bones and long hair remained [...] A3: There was a metal box like a radio, and a shovel was on top of the plastic fabric. [...] A4: I reburied all the material and the corpse back into the grave. The corpse is still in the grave now." With respect to the second: "I cannot tell you all about the second pit; my son is the one who knows that clearly. At the time we were digging a pit for a toilet, and we saw the grave. My parents called me to see the uncovered corpse. When I reached the corpse, I saw two steel re-bars, each about a metre long, on the plastic cloth together with square aluminium box about 30 centimetres on each side that looked like a radio, a military canteen, an aluminium military nested canteen cup, and a locked chain around the ankles. Buried in the pit were around 30 red folding-steel-chairs and a folded shovel. We did not take any of the objects for our

use because they were so dirty and had a foul smell. [...] we reburied those objects back into the pit. [...] A4: The second pit was found by my father-checker patterned plastic cloth. After he opened the cloth around the body, he saw a skull with African-like short curly hair and the flesh was black and totally decayed. Thus, we could not distinguish whether the corpse was a woman or a man. Because the odor was so strong, we did not open the plastic cloth wrapped around the entire body. At that time we did not approach them; however, we hid ourselves behind a rock and watched them digging at the pit. We saw them lifting and putting something like gold, necklaces, and other jewelry into a sack. I saw those objects flash in the jeep headlights. The next morning the monastery head and I went to look at that pit, and we saw five empty jars in the pit. We did not touch those jars. Actually, the people should have poured hot water on your head. You did not have the right to monitor them. Before you killed people, did you get permission from your superior?’ Q: Did you hear Meas Muth scolding Ta Nhan like this first-hand? A120: Yes, I heard that first-hand, because that time there was an assembly which the Division 164 leaders attended. Q: When Meas Muth told Ta Nhan, “Before you kill people, you have to get permission from your superior.” What did he refer to by “superior”? A121: Ta Nhan was the commander of Regiment 63 under the management of Division 164 where Meas Muth was the commander. Therefore, in this sense, it meant that Ta Nhan needed permission from Meas Muth. Q: Do you know in what circumstances those people were taken to be killed by Ta Nhan? A122: I do not know in what circumstances the people were killed by Ta Nhan, but I remember that in that meeting Ta Nhan reported to Meas Muth that he had killed

- people. Q: When did the assembly take place? A123: It happened in 1975, but I do not remember the month. Q: You arrived in Kampong Som on 20 April 1975, can you estimate when the assembly took place? A124: As far as I can remember, it took place in July 1975”].

1867 **D114/194** Sorn Sot WRI, A39 [Former Battalion 386 combatant disarmed and sent to cultivate rice: “Q: Did you ever hear of place called Teuk Sap? A39: Yes, I did. It was place to detain prisoners. My group was detained over there. If anyone who was cultivating rice with me and committed mistakes, we would be detained there”]; **D114/85** Chet Bunna, WRI A5-6 [“We were considered the same as prisoners. We were not detained, but we were tempered. If they were not satisfied with our work, they would send us to Teuk Sab immediately. I mean that if they were not fond of our behaviour or work, or if we complained about the work, they would immediately send us to Teuk Sab [...] they placed us aside to be scrutinised, followed up and tempered. In short, they treated us even worse than they did to the 17 April people [...] They monitored us carefully. Therefore, if we made even a tiny mistake, they would take us to be punished immediately [...] A6: While we were within this bad component unit, we were convinced that if we made even a minor mistake, we would immediately be taken to be punished. At that time, I was about 18 years old. At that age one was supposed to consume a lot of food. However we never ate enough. If anyone took or stole anything, he would be taken to be imprisoned at once. As I mentioned in the previous interview, only one of the three people who were arrested at my place and imprisoned in Teuk Sab managed to survive and return”]; **D114/66** Chet Bunna WRI, A19 [“Whenever there was anyone in the not-good-element had made a mistake, he/she would be sent to be detained in Teuk Sap. Secret work is fundamental in all that we do. For example, the elections of comrades to leading work are secret. The places where our leaders live are secret. We keep meeting times and places secret, and so on. On the one hand, this is a matter of general principle, and on the other, it is way to defend ourselves from the danger of enemy infiltration. As long as there is class struggle or imperialism, secret work will remain fundamental. Only through secrecy can we be masters of the situation and win victory over the enemy who cannot find out who is who. This also applies to foreign affairs. For example, the Soviet Union asked to come to Phnom Penh at liberation. They were preparing to send 200 men to the Embassy. We said we could not possibly receive them and they were furious. 2265 While the OCIJ S-21 Prisoner List contains only 5,512 execution dates, that is because the analyst who prepared the list focused her review on entry lists documenting the arrival of prisoners at S-21, and did not review all available execution lists and record those dates in the OCIJ spreadsheet. **D234/2.1.144** Hin Sotheany, T. 9 Jan 2017, 09.56.39, 10.36.23-10.41.07, 11.01.54, 11.06.05-11.08.46, 11.35.27-11.36.57, 13.35.27-13.36.56, 13.54.48-13.56.10 [“Q: Do I understand correctly that you did not have sufficient time to go through all the execution lists and put all those dates into the spreadsheet; is that correct? enemies burrowing inside [party] In general, internal enemies burrowed inside [party] during this month have much more gradually and intensely committed acts like encouraging [people], drilling conflicts, fighting [us], and opposing in all forms. These acts were originated from a small number of no-good elements that are henchmen of the enemies or those [whose names and activities] appear in the confessions of the enemies, elements screened out from various units and army, April 17 elements who were former civil servants, and many other Chinese and Vietnamese emigrants. In these above acts, however, they have not been able to inflict any serious acts on us because all of forms of their acts have gradually been perceived by people, our combatants, and cadres who have gradually succeeded in taking steps to remove, screen out, and sweep them by following the party's guideline and assignment"].

Informants observed this pattern in the Khmer Rouge's collection of all four Vietnamese families in Pochen Dam, and said that KR cadres did not make such a distinction when they collected other people from the village. Informants from other villages, however, said that the Khmer Rouge in their village collected only the Vietnamese parent (and not his or her children), and still other informants said that KR cadres collected the entire family if they found out that even one member was Vietnamese. A: The training was given at the battalion. After receiving training from the division level, the regiments and battalions opened small training sessions as well on the islands. Q: Who would attend the training? Who was being instructed? A: The trainer was the commander of each battalion who received the order from the upper level. Q: Did all of the soldiers or sailors in the battalion, were they all in attendance or required to attend, to the best of your knowledge? A: Yes, it was the policy of the Communist Party of Kampuchea. They announced that all soldiers in division 164 needed to attend the training. Q: Now sir, when you had a training like this, how serious was it for those of you that had to attend? Were you were allowed to debate and say, 'I don't agree with what's being taught'? A: At that time, when we studied about the hereditary enemy, so no one dared to debate about what we were taught about the hereditary enemy, and we needed to follow what we were taught. Q: Thank you for helping us with that. Now, what exactly did the instructor say, instructors say about the hereditary enemy, the Vietnamese?:A. I assumed that that boat could have been used to carry the Vietnamese migrants or refugees. Q: What genders were those Vietnamese? A21: There were men, women and children. [...] Q: Did you see the boat or the Vietnamese the following morning? A26: The following day, I did not go back to that beach, but later I heard my military colleagues saying that they all had been executed. Q: How did your military colleagues know this? A27: I am not quite sure. It was through word-of-mouth that the information travelled. I assumed that there were two scenarios. A47: It is correct [...] Q: To your knowledge, what happened to the arrested refugees at the time? A52: When we came to know about it, I knew that they killed them. I did not know beforehand about a plan to take them to be killed. Q: Do you know by what means and where they were killed or not? A53: I only know points about which I am not certain, because back then I was young and paid no attention to killings committed by the upper echelon. 3396 The ICIJ charged Meas Muth with crimes committed during the purge of Division 117 (**D174** Written Record of Appearance, pp. 5, 8) and rescinded the earlier charges relating to Sector 505 cadres (**D174** Written Record of Appearance, p. 10). By his Introductory Submission, paras 43, 65-66, the ICP seized the Co-Investigating Judges with the purge of Division 117 and through **D120** Supplementary Submission, paras 12-14, he clarified that "the purge of Division 117 military cadres and Sector 505 civilian cadres in Kratie Province in late 1978 [...] is included within the scope of crimes to be investigated in Case 003". In any event, the purges of Sector 505 cadres and civilians were indivisibly bound to the purges of Division 117 military personnel and constitute circumstances of the Division 117 purge. As set out below, although holding notionally civilian positions at the time, the high-ranking Sector 505 cadres purged in late 1978, including Sector Secretary Meas Moeun, Kratie District Secretary Huon Yeng and Snuol District Secretary Chhum Chin alias Phoan were RAK military cadres, some from Division 117 itself, and each of these men was involved in the border fighting with Vietnam alongside the Division 117 military cadres. Moreover, the arrests of the senior Division 117 and Sector 505 cadres and civilians were contemporaneous, motivated by the same perception of treachery after military defeats against the Vietnamese. The arrestees were brought to S-21 together and the meeting called by Meas Muth as the purge was underway convened both military and civilian cadres. On 01 December 1978, *Angkar* arrested me and sent me here”]. Statements concerning circumstances of the torture victim’s arrest, especially those implicating the torturer, are not excluded by art. 15 of the CAT for a number of reasons. Art. 15 of the CAT states: “Each State Party shall ensure that any statement which is established to have been made as a result of torture shall not be invoked as evidence in any proceedings, except against a person accused of torture as evidence that the statement was made.” Roath Leang’s statement was not “made as a result of torture”. The information was objectively verifiable and known to the DK authorities and he did not say these things *because* he was being tortured or to please the S-21 interrogators. (*See* Case 002-**F26/12** SCC Torture Decision, para. 68 [“whether information [...] [was] obtained by torture is a matter of proof”]; Case 002-**E350/8** Trial Chamber Torture Decision, para. 49 [“The Trial Chamber considers that certain objective information contained on confessions is not part of the statement obtained through torture and therefore not covered by the exclusionary rule in Article 15 of the CAT” (*emphasis added*)]; Case 002-**E3/1555** OCIJ Torture Decision, para. 19 [“the confessions at issue in the present case contain certain information that was not obtained as a result of torture. [...] This category also includes any objective information included in the confession which exists independently of the interrogation, such as the date of the person’s arrest, [...] as well as basic biographical information such as the name, age position and/or work unit of the person subject to torture”]. Moreover, this statement directly implicates Meas Muth, who is charged with playing a role in the detention, torture and execution of RAK cadres sent to S-21, including Roath Leang who, as is clear from the annotations on an earlier confession was physically tortured (*see* **D114/136.2**, EN 01189352, KH 01165508 [Annotation: “Comrade Von tortured him for a fortnight. He finally admitted to the charge and agreed to make this document”])). Ruling such use inadmissible would be contrary to the very purpose of the CAT and would shield torturers by preventing the use of relevant evidence against them.

A: In this period, after liberation, it is *secret* work that is fundamental. We no longer use the terms ‘legal’ and ‘illegal’; we use the terms ‘secret’ and ‘open’. Secret work is fundamental in all that we do. For example, the elections of comrades to leading work are secret. The places where our leaders live are secret. We keep meeting times and places secret, and so on. On the one hand, this is a matter of general principle, and on the other, it is way to defend ourselves from the danger of enemy infiltration. As long as there is class struggle or imperialism, secret work will remain fundamental. Only through secrecy can we be masters of the situation and win victory over the enemy who cannot find out who is who. This also applies to foreign affairs. For example, the Soviet Union asked to come to Phnom Penh at liberation. They were preparing to send 200 men to the Embassy. We said we could not possibly receive them and they were furious. - 3677 From their inception, CAH were intended to protect the human rights of every national of a state, including military personnel, against the widespread or systematic brutality of governmental or other organisations. In the 1919 Commission Report on the responsibility of Germany and its allies for crimes committed during World War I, the Commission recognised a species of international crime "against the laws of humanity" (see, e.g., 1919 Commission Report, pp. 113, 115) applicable to the attacks by Turkey against its own nationals, chiefly Armenians, on its own territory. In formulating those conclusions, the Commission relied on evidence that the Turks had targeted Armenians *within the Ottoman army* by disarming Armenian soldiers, transferring many to labour brigades and subjecting many to eventual execution. See 1919 Commission Report, pp. 112-113 and Annex I, p. 30, referring to the report of the British Commission under Viscount Bryce on the Treatment of Armenians in the Ottoman Empire, in particular "A Summary of Armenian History up to and Including the Year 1915 - Part VI: The Deportations of 1915: Procedure", paras 3, 4, 7.

 3706 ICCPR, art. 6(2) [“In countries which have not abolished the death penalty, sentence of death may be imposed *only for the most serious crimes* in accordance with the law in force at the time of the commission of the crime and *not contrary to the provisions of the present Covenant* and to the [Genocide Convention]. *This penalty can only be carried out pursuant to a final judgement rendered by a competent court.* (Emphasis added)]. The Human Rights Committee has confirmed that executions carried out in breach of the fair trial guarantees contained in the ICCPR will breach ICCPR, art. 6(2). *See Mbenge v. Zaire*, para. 17 [“the failure of the State party to respect the relevant requirements of article 14(3) leads to the conclusion that the death sentences pronounced against [Mbenge] were imposed contrary to the provisions of the Covenant, and

therefore in violation of article 6 (2)”; ECHR, art. 2(1) [“Everyone’s right to life shall be protected by law. No one shall be deprived of his life intentionally save in the execution of a sentence of a court following his conviction of a crime for which this penalty is provided by law” (*emphasis added*)]; ACHR, art. 4(2); GCs Common Article 3 [“the following acts are and shall remain prohibited at any time and in any place whatsoever [...] the carrying out of executions without previous judgment pronounced by a regularly constituted court, affording all the judicial guarantees which are recognized as indispensable by civilised peoples” (*emphasis added*)].

- 3707 ICCPR, arts 6(1) [“Every human being has the inherent right to life. This right shall be protected by law. No one shall be arbitrarily deprived of his life”], 4(2) [“No derogation from [art. 6] ... may be made under this provision [permitting limited derogations from certain ECHR obligations ‘in time of public emergency which threatens the life of the nation and the existence of which is officially proclaimed’]”]; ECHR, arts 2(1), 15(2) [“No derogation from Article 2, except in respect of deaths resulting from lawful acts of war”]; ACHR, arts 4, 27(2) [“The foregoing provision [regarding derogation of obligations in times of war, public danger, or other emergency that threatens the independence or security of a State Party] does not authorize any suspension of [...] Article 4 (Right to Life)”. The Co-Prosecutor notes that a state of public emergency must in any event be officially proclaimed by the State’s government. *See* ICCPR, art. 4(1); CCPR General Comment No. 29 on Article 4, para. 2 [“Before a State moves to invoke article 4, two fundamental conditions must be met: the situation must amount to a public emergency which threatens the life of the nation, and the State party must have officially proclaimed a state of emergency. The latter requirement is essential for the maintenance of the principles of legality and rule of law at times when they are most needed”]; ECHR, art. 4(1); ACHR, art. 27(3).
- 3708 ICCPR, arts 6(2)-6(3). The prohibition on genocide is a norm of *jus cogens*, from which no derogations are permitted. *See, e.g., DRC v. Rwanda*, para. 64 [discussing a norm having the character of a peremptory norm of general international law (*jus cogens*), “which is assuredly the case with regard to the prohibition of genocide”].

3796 Case 001-**F28** *Duch* AJ, paras 191-192, 195-197, 205; 1975 Declaration on Torture, art. 1.

3797 This issue is irrelevant to the adjudication on the current case as all of the acts of torture alleged were committed by officials or foot soldiers of the regime. However, as a point of law, the Co-Prosecutor submits that, while the reference to torturers being officials of a state reflects CIL as far as the obligation of States is concerned, the ICTY and ICTR have correctly rejected the public official requirement in customary international criminal law. The 1975 Declaration on Torture, and later 1984 Torture Convention, were addressed to States and sought to regulate their conduct. In that context, it is understandable that they deal with the acts of individuals acting in an official capacity, however, as a CAH it is illogical to distinguish individuals who are public officials from others who are not but who commit the same acts, with the same intent and with the same consequence for victims whose suffering is hardly relieved by the knowledge that the individual is not a public official.

Given the overarching requirement that assistance, encouragement or moral support must have a substantial effect on the commission of the crime, the necessary causal link cannot exist where assistance is provided *exclusively* after the time of perpetration. However, as long as the requirement of substantial effect is fulfilled, conduct such as an agreement made *before or during* the commission of a crime, of assistance to be provided after the fact, may suffice. ECCC Law, art. 29^{new} contains the specific requirement that the superior must have “effective command and control or authority and control over the subordinate.” This is consistent with the case law of the *ad hoc* Tribunals where it has been held that, for criminal liability to arise on the basis of a superior-subordinate relationship, it must be shown that the superior had effective control over the perpetrators. This same interpretation has been used by the ECCC Trial Chamber. See Case 001-**E188** *Duch* TJ, para. 540; Case 002-**E313** Case 002/01 TJ, para. 715

- 4123 Case 001-E188 *Duch* TJ, para. 541; *Halilović* AJ, para. 66. Although *de jure* control is neither necessary nor sufficient to prove effective control, it constitutes *prima facie* a reasonable basis for assuming that an accused has effective control over his subordinates. See, e.g., *Čelebići* AJ, para. 197; *Hadžihasanović & Kubura* AJ, paras 20-21; *Nahimana* AJ, para. 625; *Ntabakuze* AJ, para. 169.

However, the absence of proof of orders is not demonstrative of a lack of effective control, and the fact that subordinates might perpetrate crimes independently of orders does not show that a superior lacks the ability to prevent or punish those crimes.
