To Beloved and Missed Brother

We already received the telegram on the instruction, and only the sector party was informed of the 4-year plans. Instructions about this have already been made.

- Rain situations: although drought occurred sometimes in October 1976, they do not damage rice plants.
- The short-term rice has been harvested while medium-term rice starts to gradually ripen. The long-term rice almost produces yields.
- Rice in this year is good everywhere.
- Rice seedlings this year are more densely transplanted. As a result, they grow very well.
- I would like to request as many bolts as possible.

With warmest revolutionary fraternity

19 October 1976
